### SKILLS

- ❖ MySQL, React Js
- ❖ Tailwind CSS
- ❖ Python, C, C++, JavaScript
- ❖ Problem solving, Leadership

### ABOUT

- ❖ Information Technology student at DDU (Batch 2027) with strong skills in Python, C++, MySQL, and web technologies. Passionate about problem-solving and building user-friendly applications, with 5-star gold badges in Python and C++.

### EDUCATION

- ❖ Information Technology | Dharmsinh Desai University – Nadiad | DDU'27
- ❖ XII (GSEB) | Modi School – Rajkot  
97.26%*e* | 2023

### ACADEMIC PROJECTS

- ❖ **Python Glide**  
Developed a classic snake game named "Python Glide" using the **Pygame library in Python**. Implemented key game mechanics such as snake movement, collision detection, and score tracking, while ensuring smooth animations and intuitive controls. The game features dynamic elements like food generation and increasing difficulty levels to enhance user engagement. [Project link](#)
- ❖ **IndiCast**  
Developed a Python-based weather application named IndiCast using the **tkinter library and a weather API**, designed to provide real-time weather **details for cities and states across India**. The app features an intuitive interface that allows for easy navigation, ensuring users can quickly access comprehensive weather data. Key functionalities include displaying current temperature, humidity, and weather conditions. Additionally, the application is optimized for performance and user-friendliness, making it a reliable tool for staying updated on weather conditions in various regions of India. [Project link](#)

### ACHIEVEMENTS

- ❖ 5-star gold badge in Python
- ❖ Ex-participant at DUHacks 4.0 offline mode.
- ❖ Ex-particiapnt at DUHacks 3.0.
